POBO Group is a world-leader in design, development, and manufacture of specialized art-glass. It constantly innovates, and today produces the world’s most prestigious and creative decorative glass for industrial and architectural uses. Its glass fabrications are custom-tailored to complement and complete the vision of the architect, interior designer and client.

POBO achieves this through its skilled staff, which combines more than 25 years’ experience with cutting-edge technology, R&D, and innovation. For example, one of its major brands—ILUCIDI—was conceived by European designers and architects who were looking for a new medium to express their vision. Working in tandem with the designers and glass company Srl, POBO brought the concept to life and introduced the new specialty glass, ILUCIDI, in Italy, since the brand embodies the essence of clear, modern Italian design. The ILUCIDI brand exemplifies the new concept of relating art-glass “furniture” to the living space and provides for servicing and custom-tailoring the brand to suit individual needs and taste.

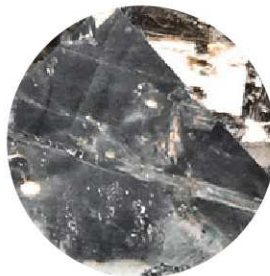

POBO constantly innovates and is the trend-setter in the application of art glass to architecture, institutions, and home design. It is on course to become the world’s leading decorative glass company, enhancing to enhancing art and lifestyle for use in the home and office.
